

MEDICAL FACILITIES

All Residents should understand that doctors who use our medical facilities are private practitioners, they are not engaged by the Company and as such, will conduct their practice as they see fit.

Should the circumstances arise whereby a Resident is dissatisfied with the service they are receiving from a particular practitioner, they should speak to them about their concerns and/or seek a second opinion. This is clearly your right. The Company cannot and should not, intervene in the doctor/patient relationship. Any concerns that our Nursing Staff may have about a particular treatment will be conveyed to the most appropriate person.
